## EXAMINER'S REMARKS

### *Specification*

1. The substitute specification filed 9 NOV 2005 is approved and has been entered.

### *Drawings*

2. The drawings were received on 9 NOV 2005. These drawings are approved.

### *Remarks*

3. The following is an Examiner's Statement of Reasons for Allowance:

The prior art of record does not teach or fairly suggest a decanter centrifuge having a rotor, screw conveyor with conveyor thread, and a baffle, particularly wherein the screw conveyor being at least two originally separate parts, each of which comprises a portion of the conveyor thread and which are kept together axially and the baffle constituting a separate member arranged to be kept in place between the parts of the screw conveyor, when kept together axially, and wherein said separate baffle member has a portion which forms a part of the conveyor thread in an area where the conveyor thread intersects with and extends past the baffle. The prior art baffles typically lack such a portion that forms a part of the conveyor thread in an area where the conveyor thread intersects with and extends past the baffle and are not a separate member disposed between separate parts of the screw conveyor.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably
